

COVID-19 IgM/IgG test kit (Colloidal Gold)

Mar 23, 2020 15:42 UTC

# COVID-19 Test KIT Available

Nowadays Humanity is passing through a Survival Test. The enemy that we can not even see is placing us into an ever unheard, constant fear and panic.

It is the time to prove and show respect to Each Human Being on the Planet and finally understand that all of us are weak and naked in front of Nature,

Catastrophes or Viruses. We would like to offer [rapid test kits](#) that are used for the qualitative determination of COVID-19 IgM/IgG antibodies in human serum, plasma and venous whole blood samples in vitro.

[Here's how to use the COVID-19 test kit:](#)

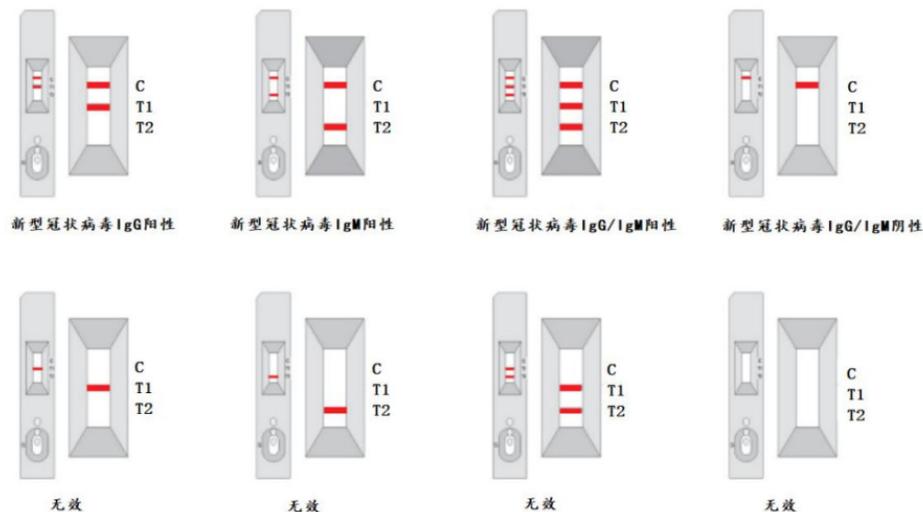

### Steps:

1. Collect blood/serum/plasma sample.
2. Add blood/serum/plasma sample to sample well.
3. Place 2-3 drops of buffer in sample well.
4. Read results after 15 minutes.

[This kit](#) uses colloidal gold immunochromatography. Testing COVID-19 IgG antibody and COVID-19 IgM antibody in human serum, plasma and whole blood samples.

**The item we offer is the only trial product tested and used in Leishenshan Hospital in the distress area of Wuhan.** Then it was quickly approved for manufacturing and promotion. Leishenshan Hospital is a temporary hospital built by the Chinese Government over a ten-day period in order to settle the challenges of treatment of infected people and to detect infected employees in the area of distress – Wuhan. Our test products are based on the up-to-the-minute nanotechnologies and rare-earth metals, thus allowing to get quick results. As a consequence, the medical staff significantly reduce their contacts with patients, thus decreasing the probability of infection.

Please check all the information available on the [website](#), including the steps, the clinical report and certificates. **If you are representing Government, Public Institution, Doctors Associations and want to order more tests please write us an email at [contact@covid19testbox.com](mailto:contact@covid19testbox.com).**

***Xiamen AmonMed Biotechnology Co. Ltd. is a subordinate enterprise of the Chinese Academy of Sciences and specialises in manufacturing, research and***

development of medical testing equipment. After a new type of coronavirus appeared in China at the start of this year, our Company was ordered by the concerned Chinese governmental departments to develop research equipment and schemes to detect that new type of coronavirus (COVID-19). Thereafter, we presented special products and equipment IgM/IgG, i.e. antibody detection test.
